Reengineer Systems

- Implement a rotational system that provides Soldiers, families, and employers predictability
- Automate and streamline procedures that are outdated, multi-layered and inefficient
- Create a TTHS account to more effectively manage Soldier and unit readiness
- Change to a 'Train-Mob-Deploy' model
- **Implement the Delayed Entry program**
Reengineering our systems allows the Army Reserve to quickly respond to the mission requirements.

Reduce Obstacles

- Focus on Leadership – Year of the Leader
- Focus Command and Control on Readiness
- Create Regional Personnel Centers to improve service to the Soldier
- Create an Individual Augmentation (IA) program to provide a continuum of service

Reducing obstacles enables leaders to Focus on Soldiers and mission accomplishment.

What Isn't Changing?

The Soldier is the Centerpiece of our Units.

Army Reserve Soldiers are:

- Effective, flexible, and adaptable
- Competent and consistent leaders across the full spectrum of operations
- The face of the Army in communities across the Nation

**Soldiers Are, Have
